The Busy Bees School Readiness Program is designed to provide Pre-School children with the foundation skills for starting school. These skills include pre-reading skills, building confidence, social interaction, following instructions and developing emotional resilience.

The School Readiness Program uses activities, games, craft and music to teach the children their letters, letter sounds, numbers, basic words and interesting facts about animals.

Each session is divided into three sections and has been developed to achieve specific learning outcomes.

- The first section includes learning the letter and number of the day (and basic words in BB2) and learning interesting facts about a specific animal. It involves activities, storytelling and games relating to the theme of the session e.g. Letter D – Dancing Dolphins.

- The second section is a craft activity relating to the theme of the session. The children also have the opportunity to practise writing the letter and number of the day.

- The third section is all about having fun with music, dancing and songs also relating to the theme of the session.

Parents are asked to stay throughout the sessions and actively participate in the games and activities.
Busy Bees School Readiness Program

6 sessions @ $15 = $90.00 +
Resource Fee - $20.00
Term 1 Fees Total = $110

Busy Bees School Readiness Program will assist your child in starting school with confidence. School is very demanding both from a social and academic perspective. If your child can recognise lowercase and uppercase letters of the alphabet and some sight words (high frequency words) and has had some practise writing letters and numbers, learning letter sounds and interacting in small groups, they will have a great start to school!
